

Ment for Others

Ment for Others

Creating a community of  
mentors and mentees

What

Ment for Others offers

A portal to intellectual  
improvement

---

# Value

- Multidimensional wellness (vs one-dimensional wellness)
- Social, intellectual, and physical wellness
- Addresses a two-dimensional problem: that it is difficult to get mentors, and it is difficult for mentors to find mentees worth their time.

# Features

- Two types of users: mentees and mentors
- Mentees can choose a field they want to pursue/learn, and see events held by mentors nearby that match the field
- Mentors create events and see possible mentees
- Mentees don't need to pay to find classes, but to connect with a class's mentor, there is a paywall.

# How do both types of users benefit?

- Mentees get to:
  - learn from capable people
  - See and try if they are able to commit to being a mentee
- Mentors get to:
  - Earn money by sharing their knowledge of expertise
  - profile and see for themselves who they deem fit to be mentees if they want

# Limitations

- We are primarily concerned about the dominant pool of users which would be the Filipino college students
- Mentors have to find or use their own venue
- Mentees don't outright become the apprentice of the mentor they choose, it's a two-way interaction.

# Demo

# Thank you
